

Block Party traffic control set-up examples for residential street adjacent to connector street

SITE MAP example for residential street next to connector or arterial street **Streets adjacent to arterial or connector streets will require professional traffic control devices (not provided in BP Trailer): such as type 3 barricades with cones, road closed, no turn signs

*Leave emergency access 20 ft wide free of equipment ***In case of emergency, residents must open barricades to allow access

 For extra security against vehicle intrusion, cars can be parked behind the barricades. They will need to be removed to allow access to emergency vehicles.
